The screenshot shows the TryHackMe web interface in a browser. The address bar displays `tryhackme.com/room/adana`. The page features a navigation bar with links to various resources like OffSec, Kali Linux, Kali Tools, Kali Docs, Kali Forums, Kali NetHunter, Exploit-DB, and Google Hacking DB. A red progress bar at the top indicates 'Room progress (40%)'.

The main content area displays the details of the 'Different CTF' room:

Title	Target IP Address	Expires
Different CTF	10.49.176.160	51min 30s

Below the table, there are buttons for '?', 'Add 1 hour', and 'Terminate'.

The 'Task 1' section is titled 'Basic scan' and includes a 'Start Machine' button. The task description reads:

10.49.176.160

hello there

We will tend to think differently in this room

In fact, we will understand that what we see is not what we think, and if you go beyond the purpose, you will disappear in the room, fall into a rabbit hole

Answer the questions below

How many ports are open ?

2

✓ Correct Answer

What is the name of the secret directory ?

/announcements/

✓ Correct

I realised that 123adana is a prefix we saw for both the above passwords. Maybe the password is also starting from that? I looked it in the list and there was only one match. Did not work.

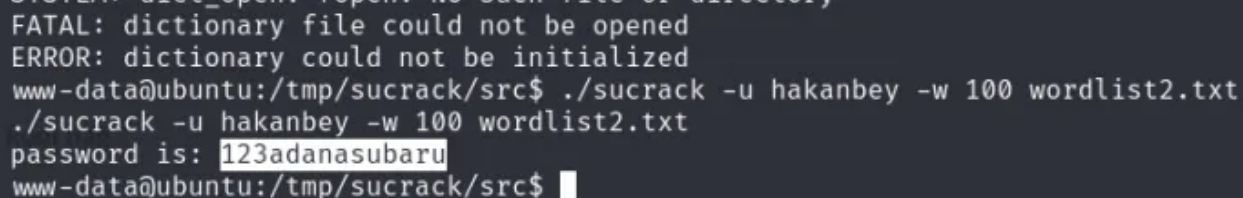

```
sed 's/^/123adana/' wordlist.txt >
